

Dexron® VI Synthetic ATF

Typical Specifications

Engine Armour Dexron® VI Synthetic ATF is a newly designed next generation fluid approved for use in passenger car and light truck automatic transmissions that require a General Motors Dexron® VI or earlier generation Dexron® Fluid. It is formulated to provide improved oxidation stability, shear stability, friction durability and foam resistance compared to earlier generation Dexron® fluids. This unique fluid is specially formulated to provide twice the service life of a Dexron®-III (H) ATF and offers enhanced performance for both new and older transmissions. It is particularly recommended for use in new GM 6-speed automatic transmissions, and is fully backwards compatible with older GM automatic transmissions.

Applications: (Dexron®, Dexron® II, III H), (GM: Type A), (Denison: HF-0/1/2), (Power Steering Units**)

API Gravity	31.7
Viscosity cSt	
@ 40 C	32.9
@ 100 C	7.20
Brookfield Vis	<13,000
Viscosity Index	190
Flash Point C	190
Pour Point C	-52

**Transmission Fluid also applicable in power steering units; check owners' manual.
